

Internship 2022

PRODUCT DESIGN & ENGINEERING

Internship period: 4-6 months, 4 days a week

Compensation: €200/month

Better Future Factory is a design and engineering studio located in Rotterdam Blue City, globally active. We help brands & organisations move to sustainable plastics. Our team of designers, engineers and plastic experts want to make products that are both beautiful and sustainable. Our team is driven by a curiosity for plastics as a material and annoyed by plastic waste. We believe that plastic can be part of a sustainable and circular economy but for this we need to use and apply plastics in the best possible way, not the worst.

What will you do

- Design & Engineer sustainable (plastic) products
- Transforming a project brief into a design
- Prototyping (3d printing, laser cutting, foam models)
- Creating 3d models (e.g. with Solidworks, Fusion 360, Onshape)

What are we looking for

- Student in design/engineering (HBO or University level)
- Technical, practical and creative;
- Passion for sustainability
- Visual thinker
- Well done is better than well said mentality
- Work independently as well as a team player;
- Good written and oral English and Dutch communication skills;

What we offer

- Working with a young and talented team of designers, engineers and plastic experts working for major brands (e.g. Ikea, Lego, Unilever) worldwide
- Independence & responsibility
- Personal guidance with weekly 1 on 1's and daily stand ups
- The chance of making the world a better place
- Most beautiful office in Rotterdam, Blue City (former tropical swimming pool)
